

D4.3 Annotated Demonstration Dataset - Pilots (DATA)

Lead Beneficiary: Performance Technologies (PT)

Dissemination Level: SEN

Date: 30/04/2025

GA Number: 101102641

Version: 1.0

Executive Summary

The Annotated Demonstration Dataset for Pilots was produced from the Simulated Athens Experiment. It contains important synthetic but realistic data that can be used as a testbed for developing, optimizing and testing the TRACY algorithms and methodologies, and potentially for further development purposes. The simulated data has been used extensively to TRACY development, training and validation and is an efficient alternative when legal or technical issues block data acquisition. This data set is an updated version of the deliverable D3.2 adapted to the characteristics of the pilot cases being developed on the TRACY Platforms.
